

# Unibanco — Refurbishment Program

Brasil

**Client**

Unibanco — União dos Bancos Brasileiros

**Value**

US\$8,000,000

**Completion**

2001

**Assignment**

Construction Management

Bovis Lend Lease managed the rebrand/rollout program after Unibanco acquired Banco Bandeirantes; the program encompassed 206 sites in three regions, North, Northeast and Centre.

The program included field surveys, architectural and installation layouts and drawings, general bid process and supplier selection.

The field surveys, one-day visits to each site, included photographic documentation, on site measurements, layout weak points, electrical review and analysis.

Upon completion of the site surveys, new layouts were provided. After selection of suppliers through the bid process, construction commenced.

The refurbishment included flooring, ceiling, lighting, painting, furniture, air conditioning, new electrical and data infrastructure, safety and telephony.

Each branch refurbishment was completed within 45 days in compliance with the Brazilian Central Bank; each branch was fully operational during refurbishment.
