Nortel appointed Bovis Lend Lease as one of its five strategic alliances with internationally recognised engineering and construction services companies to accelerate build out of customer network infrastructure solutions. The alliance followed a long and successful relationship over some seven years between Bovis Lend Lease and Nortel Networks, mostly on Local Data Communications (LDCN) Network installations on RAF Stations over two phases. This comprised the Management of all works associated with the Installation of a new data communications network on some 130 RAF stations including in Canada, Cyprus, the Falklands, Gibraltar, Northern Ireland and the UK.

As a global partner, Bovis Lend Lease complements Nortel's in-house expertise, enabling Nortel to focus on its core competency of delivering high-performance internet solutions.

Bovis Lend Lease, following its alliance appointment, worked with Nortel in Portugal, managing the deployment of the OniWay UMTS network.

Currently Bovis Lend Lease is providing Management Services in the UK for Nortel's Vodafone and O2 Programmes.

The close working relationship has extended to the other regions too. To date we have successfully delivered services to Nortel in or for the following countries:

Asia Pacific:
Japan.

Central and Latin America:
Argentina, Bolivia, El Salvador, Guatemala, Honduras, Paraguay and Peru.

EMEA (Europe, Middle East, Africa):
Portugal, Turkey and the UK.
